

Soba-making Experience at the Miharashi Community Center

On the gentle slopes between Mt. Asama and the Chikuma river, you can find the Miharashi Community Center. Making soba here while enjoying the distant scenery of the Yatsugatake mountains and fields below is an unforgettable experience.

The community center's Nuka district is known for producing delicious soba thanks to the agreeable climate. Knowledgeable locals thoroughly explain the process of making soba here, so even beginners will have no problem making delicious noodles.

In addition to soba-making, we offer agricultural experiences, camping, barbeque, wood-fired pizza and more!
